

Designed for your natural state

Red Rock Beach House, 1770

Multi Award-winning Bark Architects design homes that are individually crafted for your environment and lifestyle.

Our Approach

"Celebrating its natural, coastal setting, the house explores ideas of lightness, layers of transparency and integrating indoor / outdoor living, as is a simple series of stepped timber platforms that enable a contemporary coastal lifestyle to unfold within a very special landscape." - *Lindy and Steve, Bark Architects*

Client Response

"We are now the proud owners of the most amazing beach house on one of the most amazing beaches in Australia. And as we sit watching turtles, whales, sea eagles, ospreys and wallabies there is literally nothing we would change. The design process was a pleasure. Lindy and Steve captured very early the essence of what we wanted, a modern beach house immersed in nature." - *Ian, Client*
